

Denver County 2021

Drainage and Flood Mitigation Projects in Your Area

[Denver, CO, February 2021] Mile High Flood District (MHFD) is partnered with 41 local governments to master plan drainage improvements throughout the Denver Metropolitan area; design, construct, and maintain stream corridors including removal of trash and debris; provide flood warning services, and develop resources related to improving water quality in our streams. MHFD is pleased to inform you about the projects we are planning in 2021 for your county.

Capital Improvement Plan (CIP) Projects:

This program leverages local government dollars to fund stream projects that reduce flood risk and provide community amenities. The 2021 Work Plan includes the following projects for Denver County:

- Bowles Ditch Separation
- Irondale Gulch
- Weir Gulch Reach 1 – 8th Avenue to South Platte River
- Goldsmith Gulch - Evans Avenue to Monaco Parkway
- Globeville Levee Project
- Harvard Gulch - at Jackson Street
- Outfall Improvements along South Platte River

Sanderson Gulch

Studies:

Watershed Planning studies that have been requested or sponsored by municipalities within Denver County in 2021 include:

- Dry Gulch Flood Hazard Area Delineation

Stream Maintenance Efforts:

This program helps local governments manage publicly-owned reaches of regional streams. The 2021 Work Plan includes the following efforts for Denver County:

- Annual Vegetation Management and Debris Removal
- Sediment removal
- Restoration Projects
- Minor Repairs

First Creek Park

Special Projects:

MHFD is starting several Special Projects in 2021. Special Projects are related to data development, guidance, and research. Many are District-wide efforts. The following are specific to Denver County:

- 5-Point Youth Ambassador Public Outreach Pilot Project
