PROJECT ENGINEER

Description:

This is a full-time, exempt position as a Project Engineer with the Mile High Flood District (MHFD). This position provides a variety of professional functions associated with master planning, floodplain mapping, design and construction and stream management. The Project Engineer position plays a critical role in working with the watershed management team to support local government partners and complete successful watershed and stream projects.

Duties and Responsibilities:

- Plans, coordinates, and manages capital improvement projects, including the management of project consultant and contractors.
- Conducts watershed master planning studies including the procurement and management of mapping and engineering services.
- Oversees the development and technical review of supporting documentation for Flood Hazard Area Delineation studies.
- Reviews private land development referrals for compliance with the MHFD Maintenance Eligibility Program (MEP).
- Oversees stream maintenance activities.
- Administers consultant and construction contracts, including the bidding and award process.
- Maintains a strong relationship with developers, consultants, contractors, local, state, and federal government officials.
- Actively participates in special projects.

Minimum Qualifications:

- Bachelor's Degree in Civil Engineering or other relevant branch of engineering.
- Colorado-licensed Professional Engineer.
- Five (5) years' experience of which at least three (3) must be in responsible charge in the field of stormwater management and/or floodplain management. A Master's Degree may be substituted for one year of experience.
- Four (4) or more years' experience in responsible engineering work with civil engineering consulting firm, construction firm, and/or a public agency.
- Experience shall include engineering design, hydrology and hydraulics, construction management and/or related activities.

Key Competencies:

- Extensive knowledge of hydrology, hydraulics, drainage, and floodplain management concepts.
- Working knowledge of the technical and practical aspects of engineering design, project supervision, construction, and maintenance.
- Demonstrated ability to apply such knowledge and concepts to specific problems.

- Ability to work effectively and cooperatively with other members of the staff, other governmental agencies, consulting engineers, and the public.
- Excellent verbal, written, and interpersonal communication skills.
- Must have a demonstrated interest and ability in maintaining technical proficiency.

Availability and Salary:

- Immediate Opening
- Starting compensation range: \$76,000 - \$97,000 (Compensation will commensurate with experience)
- Application Closing Date: Until Filled
